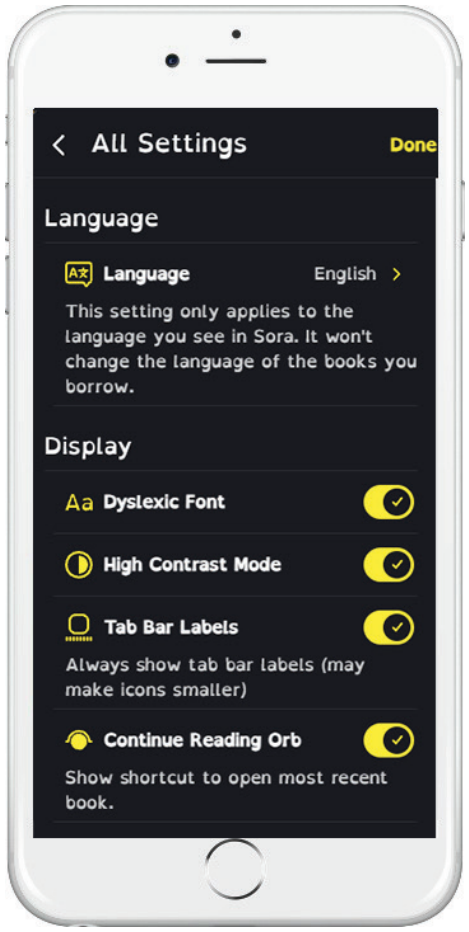
Sora
The student reading app

The Sora app makes reading accessible for your students

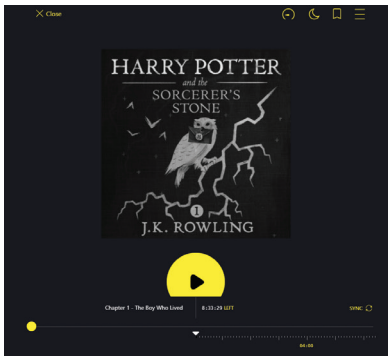


DYSLEXIC FONT

Sora offers dyslexic font settings for individual ebooks and throughout the app's interface. Dyslexic fonts can help alleviate some symptoms of dyslexia, like the turning and swapping of letters.

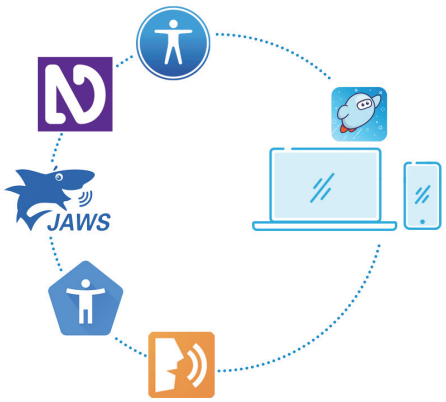
HIGH CONTRAST

High contrast mode is also available in Sora's interface and in its ebooks. For those with low vision, high contrast options can improve readability and app navigation.



SCREEN READER SUPPORT

We follow WCAG guidelines to make Sora accessible. This includes skip links, alt text, labeled elements, logical tabbing order, and much more.



Sora should work with most screen readers, but we test on:

- Android Accessibility Suite
- ChromeVox
- JAWS
- NVDA
- VoiceOver
